About Lumissil Microsystems – Division of ISSI

- In 2011, ISSI a Memory products Fabless Semiconductor company diversified into Analog Products with the acquisition of SiEn Semiconductor
- In 2017, ISSI acquired two entities “Taiwan based MCU company” and a “Division of Sigma Designs” to add MCU and Wired Networking/Connectivity competence to Analog and Mixed Signal (AMS) Product Line
- In 2020 ISSI created an independent Analog & Mixed Signal Division called “Lumissil Microsystems”
- In 2020 May , Ingenic(北京君正) finished merged ISSI group, Stock ID: 300223
- Lumissil Microsystems develops and markets Analog & Mixed Signal, Applications Specific Microcontrollers and Connectivity products
- Lumissil is part of the ISSI Group Company with Independent Engineering, Sales and Marketing Organization
- Quality, Operations and Infrastructure is still combined with ISSI
- Approximately 200 people worldwide including offices in US, Europe, Israel, Taiwan, China, Japan, SEA/India and Korea
- Foundry & Backend Partners: – Tower Jazz, VIS, TSMC, SMIC, CSMC and HHGrace; Greatek, JCET, TSHT, HXTA & Goodark

Lumissil Products that deliver affects to generate SIGHTs, SOUNDs, SENSE and CONNECT

- SIGHTS – Family of FXLED Drivers and Auto LED Drivers for lighting and special affects

- SOUNDs – Family of Audio Amplifiers to generate sound affects

- SENSE – Family of Proximity, Gesture and Touch Sensors

- CONNECT- Home and In Vehicle Networking

Lumissil at a glance

AMS

Analog Mixed Signal Division

A Division of **ISSI**

What we do?

Make Analog & Mixed Signal ICs

- LED drivers for Auto Lighting & color mixing
- Applications Specific Micro-controllers
- Power management
- Power-line communication

Quality

Committed to Design-In Quality

- Long-term Support
- ISSI's Quality and Finance Infrastructure
- AECQ-100 for Automotive
- Cost effective and innovative solutions

Headquarters

A Division of ISSI - 2020

LIN/CAN ASiCs

Five Pillars of Growth

Consumer – Gaming, AI Speakers & IoT

- Major supplier to gaming, AI speaker & IoT markets
 - Cost-effective solutions
 - High-volume quality supplier
 - Feature-rich RGB color mixing

- Roadmap to address market needs

Low power, low leakage, low EMI

High color brightness, high reliability

Evolving new product introductions

amazon

Alibaba Group
阿里巴巴集团

RAZER

PRIMAX

LEGO

Lenovo

Roland

ASUS

TONLY

Logitech

■ Human-Machine Interface (HMI)

- Color LED drivers for informative user feedback
- High Brightness LED drivers for illumination
- Audio amplifiers for audible notifications
- Capacitance sense for 'clean surface' key input

■ Growing Market

- Smart appliances require a well-defined user interface
- Our devices used in cost-effective and intuitive interface designs
- Our application engineering team is ready to assist with hardware and software support

Automotive – Solutions for Lighting and Control

- Leverage our broad knowledge of automotive semiconductor requirements
 - Focus on innovation for automotive MCUs and Lighting solutions
 - Willing to engage with our customers to define silicon solutions which meet their requirements

- Partnerships with car manufacturers, Tier 1's and technology leaders

Evaluation board kits for all our IC solutions

Applications and design support from concept to production

Meet and exceed AEC-Q100 requirements

-
- The diagram illustrates the flow of electricity from a power plant to end users. It starts with a 'Power Plant' (represented by a large industrial building) which connects to a 'Transmission Lines' (represented by a high-voltage tower). The transmission lines lead to a 'Substation' (represented by a smaller tower). From the substation, the power is distributed through 'Distribution Lines' (represented by a series of poles) to 'End Users' (represented by houses). The diagram also shows a 'Transformer' (represented by a box on a pole) which steps down the voltage from the transmission lines to the distribution lines. The end users are connected to the distribution lines through 'Service Drops' (represented by wires leading to houses).

Recent Highlights – Non Automotive

- Released IS31FL3246 – 36 Channels LED Driver, 18 bits PWM, noise reduction, white balance.
- Released IS31FL3726A – 16 Channel LED Driver with serial shift-register-plus latch-type.
- Sampling IS31FL3748 – 28V, 24x4 Channels, 40mA/Channel Matrix LED Driver, noise reduction, Spread Spectrum, white balance.

Recent Highlights – Automotive

- Released IS32LT3125/3125A -Single Channel 250mA LED Driver with Fault Detection
- Released IS32LT3123 – Quad Channel, high current LED Driver with external MOSFET
- Released IS32LT3361– 40V, 1.3A Buck LED driver with fault Reporting
- Released IS32PM3420- 3A, 36V, 2MHZ Synchronous Step-Down Converter

FXLED driver New products update

FxLED Drivers Target Applications

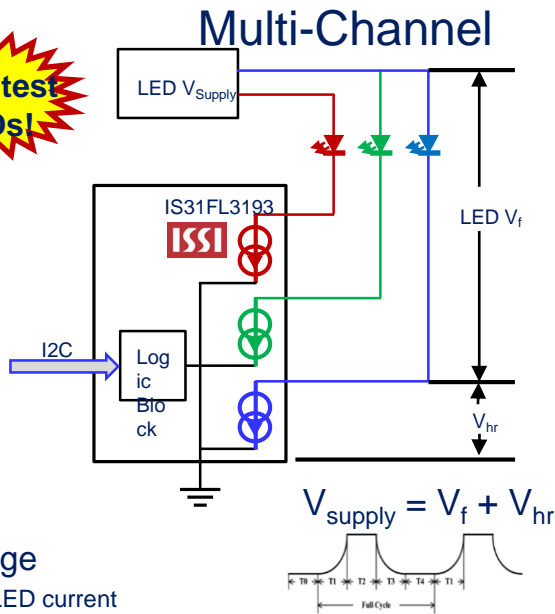

- Mobile phone
- Wearables
- VR headsets
- Gaming device
- BT/WIFI/AI Speaker
- IOT applications
- House appliances
- Whitegoods application
- Music Instruments
- Medical application
- Automotive

- Lumissil Provides the Innovative and Professional FxLED solution:
 - Provide the leading and best features to bring values to end products
 - Extensive products selection for different applications
 - Lighting Guide/LED position/ MD suggestion for better LED effect targets
 - Hardware Support like concept stage evaluation and application circuit check to minimize the hardware design risk or cycle time
 - Software coding support for robust system design, speed time to market

LED Driver Architecture Types

Brightest LEDs!

- **Advantage**
 - Higher LED current
 - Average LED current matches set current
- **Disadvantage**
 - Number of LEDs limited by number of channels
- **Competitors & Solution**
 - TI, Rohm....
 - TLC5971, LP5024, LP5018...

Most LEDs!

- **Advantage**
 - Can drive many LEDs
 - Save PCB space and LED driver cost
- **Disadvantage**
 - Scanning architecture results in lower average current
- **Competitors & Solution**
 - Panasonic, Sonix, AMS, MBI...
 - AN32181B, AS1119, AS1130, bu16501...

FxLED Driver(current source)

Type	Part Number	Description	Package
RGB Driver	IS31FL3190	One-channel RGB LED driver	UTQFN-9
	IS31FL3193	3-channel RGB LED driver	DFN-10
	IS31FL3193D	3-channel RGB LED driver	WLCSP-8
	IS31FL3194	3-channel RGB LED driver	W-CSP-8
	IS31FL3195	4- channel charge pump RGBW LED driver	QFN-16
	IS31FL3196A	6-channel, audio sync, cascade, 6 patterns	QFN-20
	IS31FL3199	9-channel, audio sync, cascade, 9 patterns	QFN-20
Multi-Channel Driver	IS31FL3726A	16-channel, serial shift-register-plus latch-type, LED driver.	QFN/SSOP/eTSSOP-24
	IS31FL3216A	16-channel, 8 frames memory, GPIO	QFN-28
	IS31FL3218	18-channel, 256 steps PWM brightness	QFN-24, SOP-24
	IS31FL3205	12-channel, noise reduction, Spread spectrum, white balance	QFN-20
	IS31FL3206	12-channel, selectable PWM frequency	QFN-20
	IS31FL3207	18-channel, noise reduction, Spread spectrum, white balance	QFN-28
	IS31FL3208A	18-channel, 1/24 DC Scaling White Balance	QFN-28
	IS31FL3209	18-channel, 1/24 DC Scaling White Balance, 76mA/CH	QFN-28
	IS31FL3235A	28-channel, 256 steps PWM brightness	QFN-36
	IS31FL3236A	36-channel, 256 steps PWM brightness	QFN-44, TQFP-48
	IS31FL3237	36-channel, noise reduction, Spread spectrum, white balance	QFN-44
	IS31FL3238	18-channel, noise reduction, Spread spectrum , white balance	eTSSOP-28
	IS31FL3239	24-channel, noise reduction, spread spectrum, white balance	QFN-32
	IS31FL3246	36-channel, 18 bit PWM , noise reduction, white balance	QFN-44
	IS31FL3265A/B	18-Channel, 40V, 60mA, noise reduction, S.S, W.B, A:I2C, B:SPI	eTSSOP-28

Strategy update for Multi channels products

Channels	Advanced	Enhanced	Basic
1~3		FL3194	FL3190/3/3D
4	with charge pump, Pattern control and power saving mode FL3195(2.7V~5.5V) FL3197(2V~3.3V)		
6/9		FL3196A/FL3199 (Auto fade in out)	
12	FL3205(38mA, 16bit PWM, 8bit DC)	FL3206(8bit PWM, better accuracy)	
16~18	FL3207(38mA, 16bit PWM, 8bit DC) FL3238(76mA, 16bit PWM, 8bit DC)	FL3216A(Audio sync) FL3208A(8bit PWM, better accuracy)	FL3218(38mA, 8bit PWM, QFN and SOP24) FL3209(76mA, 8bit PWM) FL3726A(60mA, VSB 30MHZ)
24/28	FL3239(38mA, 16bit PWM, 8bit DC)		FL3235A(8bit PWM)
36	FL3246(25mA, 18bit PWM, 8bit x3 Global DC) FL3237(38mA, 16bit PWM, 8bit DC)		FL3236A(8bit PWM, QFN& TQFP)

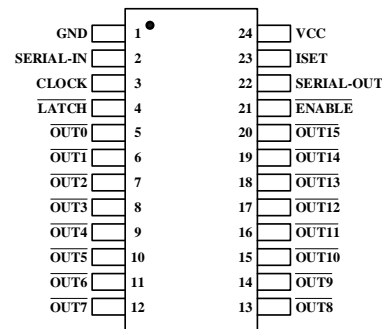

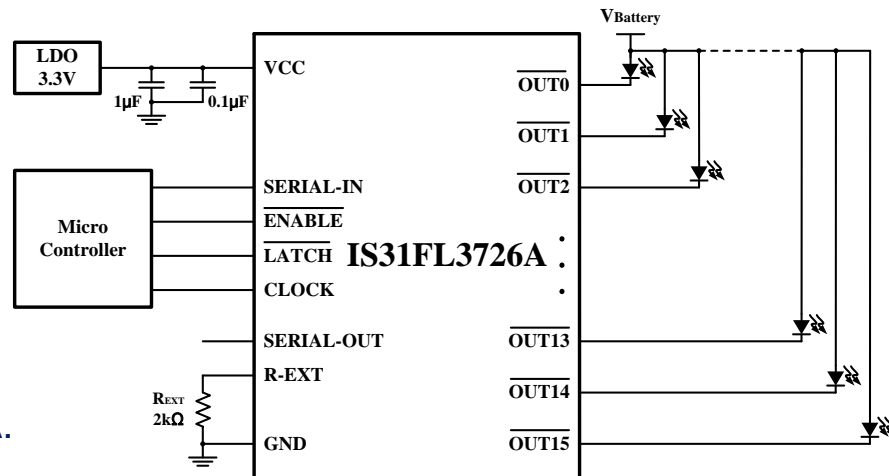

Based on customer performance's requirement and cost expectation for suitable product

IS31FL3726A- 16 Channel Driver

FEATURES

- 60mA × 16 outputs
- Current set with external resistor
- Constant current range: 5mA to 60mA
 - $I_{OUT_MAX} = 45\text{mA}$ @ $V_{CC} = 3\text{V}$
 - $I_{OUT_MAX} = 60\text{mA}$ @ $V_{CC} = 5\text{V}$
- Current accuracy (All output on)
 - Bit to bit: $< \pm 4\%$ @ $I_{OUT} = 25\text{mA}$.
 - Device to device: $< \pm 2\%$ @ $I_{OUT} = 25\text{mA}$.
- For common-anode LEDs
- Power supply voltage range, $V_{CC} = 3.0\text{V}$ to 5.5V
- Serial and parallel data transfer rate: 30MHz (Max. cascade connection)
- Operating temperature range, $T_A = -40^\circ\text{C} \sim +125^\circ\text{C}$
- Package: QFN-24 (4mm×4mm), SSOP-24 and eTSSOP-24

lumissil.com

Light • Sense • Power • Connect • Control

光傲科技

理想情况下，如果红、绿、蓝的色坐标确定，则立方体上任意位置的颜色（对应的色坐标 L_{xy} ），都可以找到对应的RGB值；一定RGB比例混合出来的颜色的色坐标是唯一的，而且线性可计算。

DC control for white balance

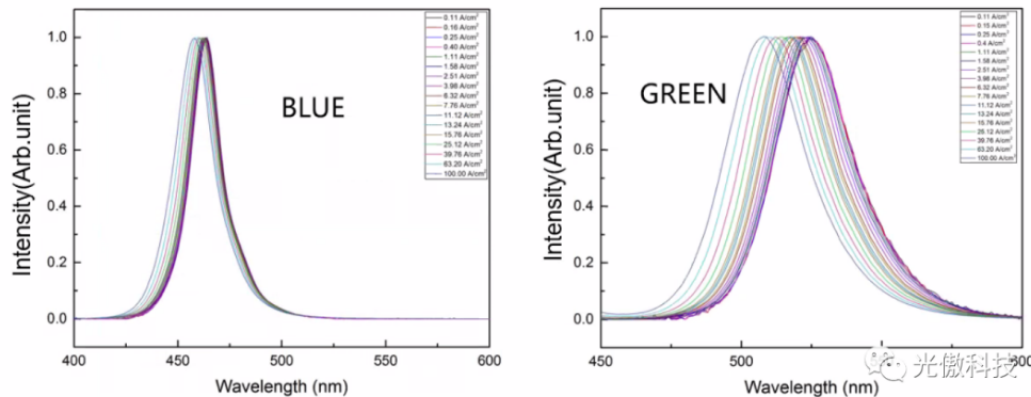

A RGB Color card
with Balance Control

DC for white balance

PWM is the right way to get target RGB color without change

LED 电流可以起到调节 LED 光输出强度的作用，但是，**电流的变化会改变LED 的颜色**，即 LED 的色度会随着电流的变化而变化，即常说的蓝移或红移。等于说，改变电流后，LED 的色域会发生变化，对应的混色结果都会改变。

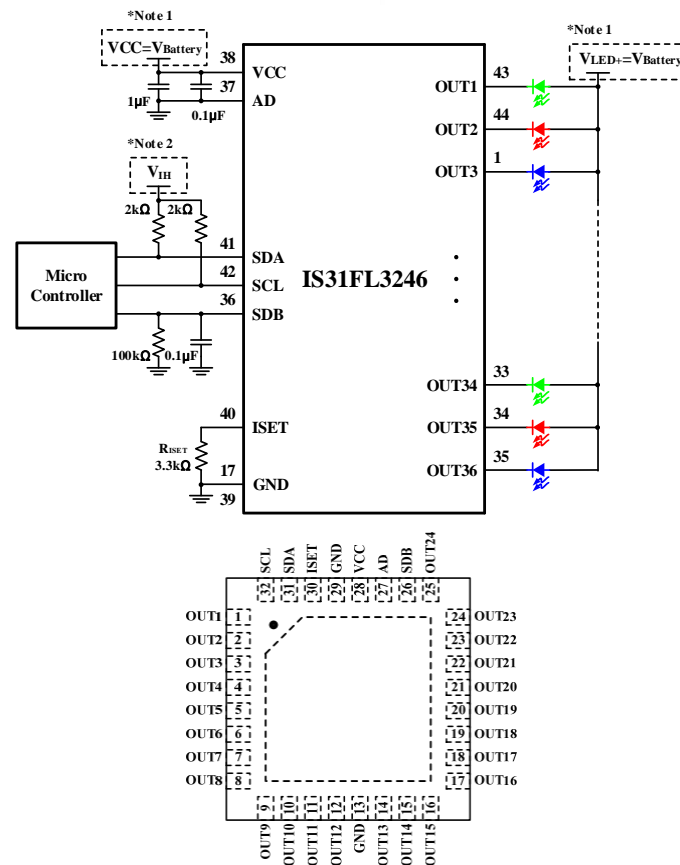

因此，为了避免电流的变化，必须采用PWM脉宽调制调光技术。PWM就是Pulse Width Modulation，即**脉冲宽度调制**。

通过施加一个 PWM 信号来控制 LED 亮度的做法允许不改变彩色的情况下完成 LED的调光。

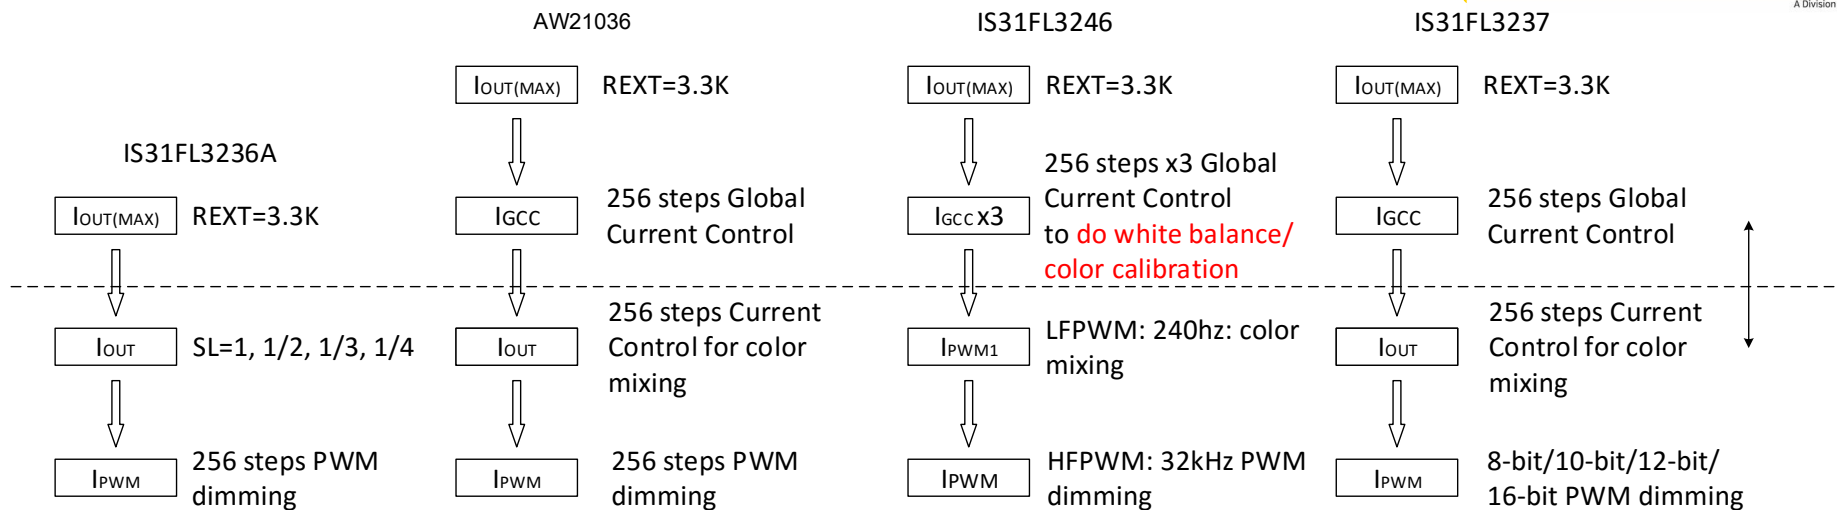

IS31FL3246- 36 Channel Driver (三维调光!)

FEATURES

- 2.7V to 5.5V VCC supply
- Pin to Pin with IS31FL3236A/IS31FL3237
- 1MHz I2C interface with 4 selectable I2C addresses
- Accurate Color Rendition, total 18 bit PWM resolution
 - 8-bit PWM @ 122Hz/244Hz for color mixing
 - 10-bit PWM @ 32kHz for breath dimming
 - 3 x 8-bit group current adjust for white balance
- Open/short detect function
- Group Dimming for Reduce Coding for RGB
- EMI Reduction Technology
 - Spread spectrum
 - Selectable 6 phase delay
 - 180 degree phase delay
- 40°C to +125°C temperature range
- QFN-44 (5mm×5mm) package

IS31FL3246 3Dimension Dimming control is the Best! 三维调光!

LED current & PWM resolution

- 3x8-bit global DC current control, all Red channels has 256 steps, all green channels has 256 steps, all Blue channels has 256 steps, can be used as white balance/color calibration
- 8-bit 120/240/480Hz LFPWM for each channel, can be used as color mixing
- 10-bit 32k/64k/128kHz HFPWM for each channel, can be used as smooth dimming control

Conclusion: IS31FL3246 is the Best Solution with real high accuracy RGB color mixing (8bit PWM) and high PWM resolution(10bit) for breathing control.

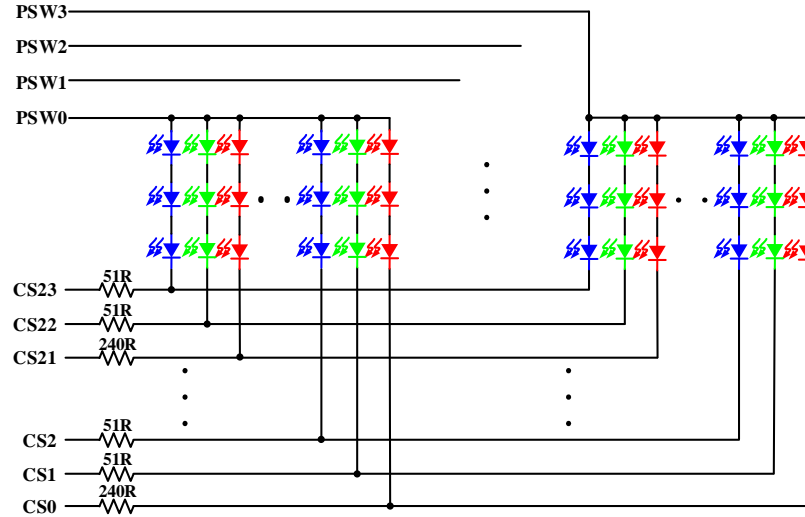

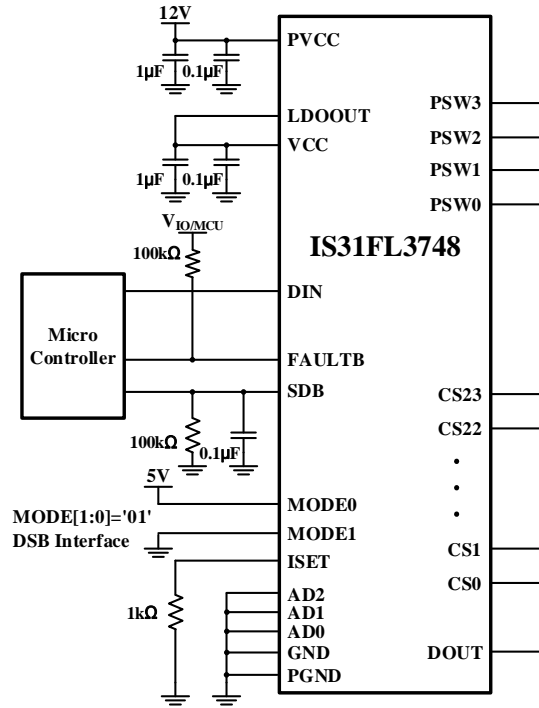

Type	Part Number	Description	Package
Matrix LED Driver	IS31FL3728	Audio Modulated 64 LEDs, audio EQ mode	QFN-24

	IS31FL3745	144 (18x8) LED, 256 Step DC&PWM	WCSP-36
	IS31FL3746A/B	72 (18x4) LED, 256 Step DC&PWM 3746A: I2C, 3746B: SPI	QFN-32
	IS31FL3748	28V, 96(24x4) , multiple interface ,256 Step DC&PWM	QFN-48

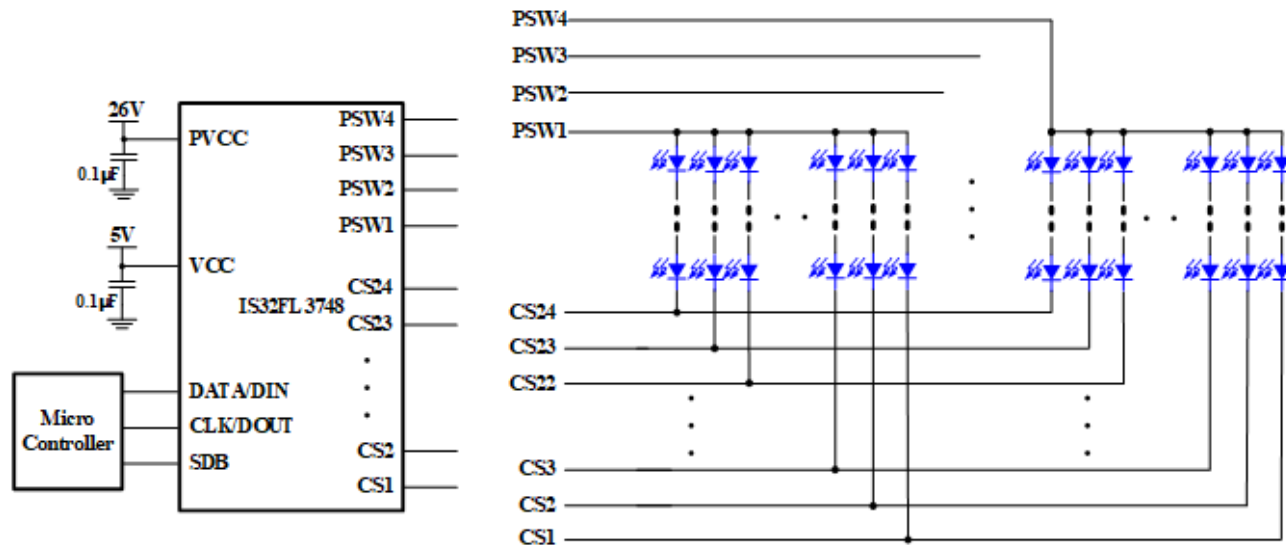

FEATURES

- Support 24 constant current channels @ 40mA/ch
- 4 PMOS high side switches (500ma each); when combining 2 for 2*24 configuration, supporting 1A each
- Tolerate up to 30V, nominal operation voltage between 4.5V to 24V
- Built-in LDO to generate 4.8V supply for internal logic (option to float it and use external power)
- Interface
 - DSB(Daisy Chained Serial Bus, 2MHz)
 - HSB(High speed Series Bus: 10MHz)
 - I2C(1Mhz)
 - SPI(12Mhz)
- SDB pin rising edge reset the interface
- Reset register reset all the registers to default value
- For DSB and HSB
 - Built-in PWM generator: 7-bit/dot
 - Built-in Dot correction: 7-bit/dot
- 7bit x 3 global current adjustment
- For I2C and SPI
 - Built-in PWM generator: 8-bit/dot
 - Built-in Dot correction: 8-bit/dot
- 8-bit x 3 global current adjustment
- 4 groups delay to minimize the power ripple
- Channel to channel timing skew (one sys-clock skew to reduce transient noise)
- Power noise reduction method
- Spread spectrum
- LED open/short detection and fault reporting(For I2C and SPI only)
- Other protection: over temperature, over voltage, under voltage
- FAULT/bidirectional: one fail, all fail optional supported (can be turned on/off by interface bus)
- Operating temperature: -40°C to 125°C
- QFN-48 (6mm×6mm) package

- Each 3748 support 24*4=96 BLU, each BLU include 9 LEDs, in series
 - Total 96 BLU
 - Each BLU include 9 LEDs, in series
- Brightness Uniformity
 - In BLU, 100% match because all LED are in series, like traditional back light LED driver
 - Between each BLU, depending on the match and accuracy of LED driver
- Efficiency
 - Constant current driver: Total Vf /PVCC, if total Vf of 9 LED is 2.7*9=24.3V, VCC is 26V, Boost is 90%, total efficacy is $24.3/26*90\%=84\%$

Strategy update for Matrix LED Driver products

Channels	Advanced	Enhanced	Basic

Introducing
echo buttons
an Alexa Gadget

Echo Buttons skills

"Alexa, launch Trivial Pursuit Tap"
Classic game pits players against each other in a fast-paced trivia race to the finish. (2-4 players)

"Alexa, launch Fourth Down Trivia"
Philip Rivers hosts an action packed daily game of football trivia. Play on your own or challenge your friends. (1-4 players)

"Alexa, launch Hangagram"
A quiz game based on solving anagrams. (2-4 players)

Test Your Knowledge
(Trivia Games)

Head 2 Head Games

"Alexa, launch Bandit Buttons"
Challenge friends and family to the ultimate button showdown! (3-4 players)

"Alexa, launch Alpha Buzz"
Put your knowledge to the test and be the fastest to name the list of categories for each letter of the Alphabet. (2 players)

"Alexa, launch Bust A Fruit"
Be the fastest player to match the color of the fruit to their Echo Button gets the point. (2-4 players)

"Alexa, launch Time Travel Cadet"
Save the universe by returning historical events to their correct order. (2-4 players)

"Alexa, launch Simon Tap"
Listen closely as Alexa rattles off a sequence of colors, or create your own pattern. (1-4 players)

"Alexa, launch Don't Cut That Wire"
A pressure cooker pattern memory game. Press the right button pattern to defuse a "bomb". (1-4 players)

Great Games
with 4 Echo
Buttons

ISSI Solution for JBL PULSE 3 and HOMEPOD

FXLED driver Markets Served by ISSI

JBL Pulse3 speaker

Original LED Design of JBL PULSE 3 96RGB

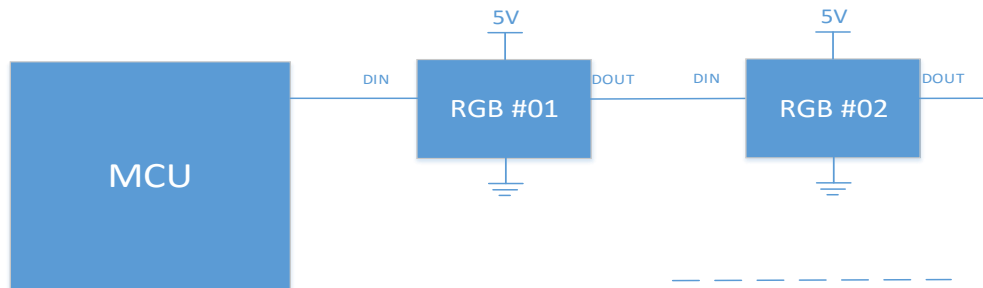

96 RGB LED (integrated IC)

Advantages

- Daisy chain, Simple connection

Disadvantages

- High system cost
- Poor reliability
- High firmware loading for controller
- Poor dimming levels, can not reach true color

4pcs IS31FL3746B.

Advantages

- Lower system cost
- More features :
 - 8 bit PWM
 - 8 bit DC current adjust
 - 8bit global current adjust
 - Open/short detection/Deghost
 - High speed SPI interface to low down the load of the MCU
 - High average current to achieve same brightness

Original LED Design of HOMEPOD 19RGB

19RGB = 57 LEDs.

5pcs TLC5971/system

Advantages

- Full function

Disadvantages

- Very high system cost

Advantages

- Lower system cost
- Simple connection
- Full function
 - 8 bit PWM
 - 8 bit current adjust
 - 8bit global current adjust
 - High speed I2C interface to low down the load of the MCU
 - High average current to achieve same brightness

FL3746 for Home POD application

Apple is using 5pcs TI 12CHs driver

Offer a Complete Lighting Portfolio for all Auto Lighting Applications

■ Audio Solutions

- Low Power Audio Amplifiers for Clusters & Ecall applications

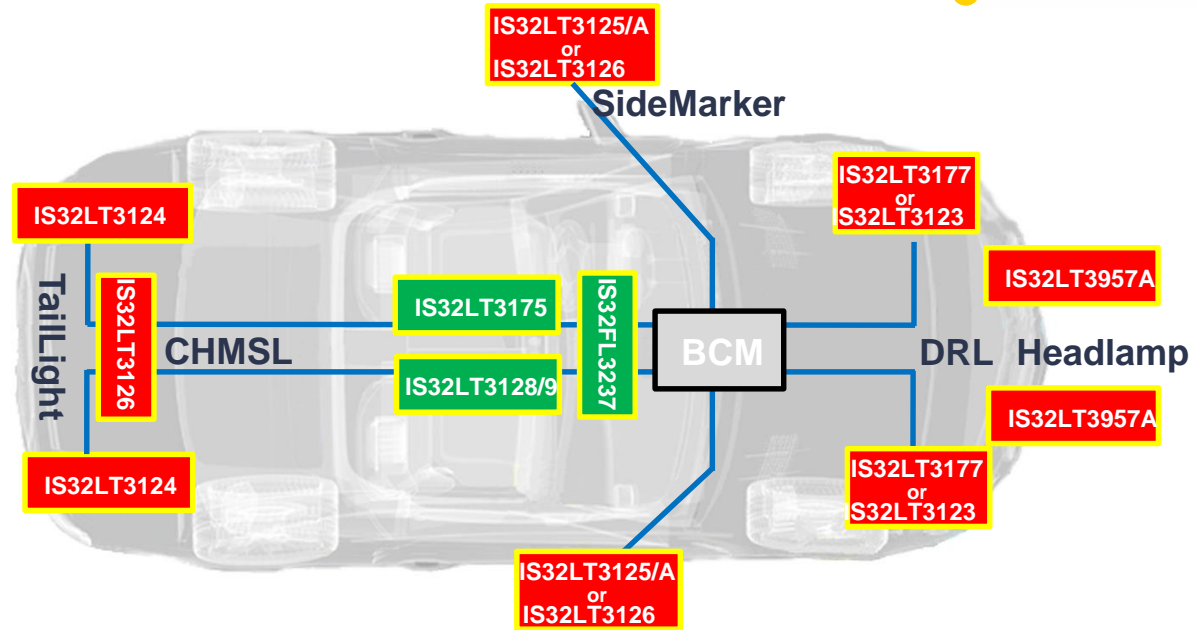

■ Lighting Solutions

- LED Drivers for Interior Lighting
 - LED Backlight Drivers for Infotainment / Cluster & Ambient applications
- LED Drivers for Exterior Lighting

Automotive:

- Stop/Tail Light
- CHMSL
- Sidemarker
- Headlamp
- DRL
- Domelight
- RGB Color
